---

## Profile

Senior Full-Stack Software Engineer with professional experience since 2019 and a technical foundation built through freelance work starting in 2017. Strong background in backend development, specializing in scalable, high-performance systems using PHP and Laravel. Experienced in cloud-native environments, modern frontend frameworks, and collaborative, distributed teams.

---

## Technical Skills

**Backend:** PHP, Laravel, Java, Spring, NestJS

**Frontend:** Next.js, Vue.js, React, TypeScript

**Mobile:** Flutter, React Native

**Databases:** MySQL, PostgreSQL, MongoDB, Redis

**Cloud & DevOps:** AWS, Docker, CI/CD (GitHub Actions)

**Practices:** Clean Architecture, SOLID, Automated Testing

---

## Experience

**Full-Stack Developer** — *Doutor-*ie** (Remote, Brazil) • Jan 2024 – Present

- Development and maintenance of scalable Laravel applications using modular monolithic architecture.
- Close collaboration with product and business teams to design and deliver features aligned with company strategy.

**Laravel Developer (Freelance)** — *C.I.E.F Worldwide SDN BHD* (Remote) • Apr 2023 – Dec 2023

- Backend development following clean code principles, repository patterns, and layered architecture.

**Laravel Developer** — *AL Desenvolvimento* (Brazil) • Apr 2021 – May 2022

- API development with Laravel and migration of legacy systems from CodeIgniter, improving maintainability and performance.

---

## Project Highlights

- Business platforms including training delivery systems and clinic management software with admin and user interfaces.
- Experience building dashboards, role-based access, scheduling, and financial workflows.
- Stack: Laravel, PHP, Blade, Bootstrap, JavaScript, REST APIs.
